DiBiaggio testifies for budget

By Colin Poltras
News Editor

HARTFORD—In order to meet the university's pressing facilities problems, President John DiBiaggio asked state officials to provide UConn with 29 more maintenance employees in a budget hearing at the state capitol Wednesday.

Saying that earlier requests for 22 physical plant positions would not "permit a timely enough assault on an ever-increasing deferred maintenance backlog", DiBiaggio noted that the additional jobs would restore those lost by

cutbacks over the past nine years.

Along with the increase in physical plant employees, the president requested four more graduate fellowships that were cut from the university's original budget recommendations after being reviewed by Gov. William O'Neill.

The President made his 7-page statement before the state's Joint Committee on Appropriations, which was assessing parts of the state's education budget. An item by item study of the budget will be made by the committee in about two weeks.

Under the current formula budgeting process, UConn is entitled to 102 additional physical plant employees but the state Board of Governors for Higher Education modified that figure to 51, Bob Clawson, UConn's director of Facilities said.

"Under formula budgeting we can justify 102 positions," Clawson said. "Because over the past ten years, as money and the budget got smaller, it was always easier to take money out of the department of the facilities than from academic areas."

If accepted by the Appropriations committee, the 29 new positions in the office of facilities would cost about \$325,000. The four additional graduate fellowships would cost the university about \$80,000.

These changes would increase the university's overall budget by about \$405,000, but the committee did not question the president's new requests.

The four graduate positions, DiBiaggio said, were needed to bolster UConn's image as a research university. "The recommendation for increased financial aid in the form of additional graduate fellowships is a vital prerequisite in building a university of nationally recognized worth," the president said.

Bozzuto will announce his gubernatorial run

HARTFORD (AP)—Former state Sen. Richard C. Bozzuto said Wednesday he expects to attain his longtime goal of winning the Republican gubernatorial nomination in 1986.

The Watertown insurance executive planned a news conference at the Capitol today to discuss his strategy.

"I will not be announcing my candidacy for any office," Bozzuto said. "But I expect I am going to be the gubernatorial nominee next year."

Bozzuto said he takes seriously claims by Sen. Lowell P. Weicker Jr., R-Conn., that he's not interested in the nomination, despite the efforts of state Republican Chairman Thomas J. D'Amore Jr. to draft Weicker.

Bozzuto said he would discuss that draft effort at his Thursday news conference.

Bozzuto expressed no interest in the seat of Sen. Christopher J. Dodd, D-Conn., the only other major statewide office up for election in 1986. Dodd is expected to seek a second term.

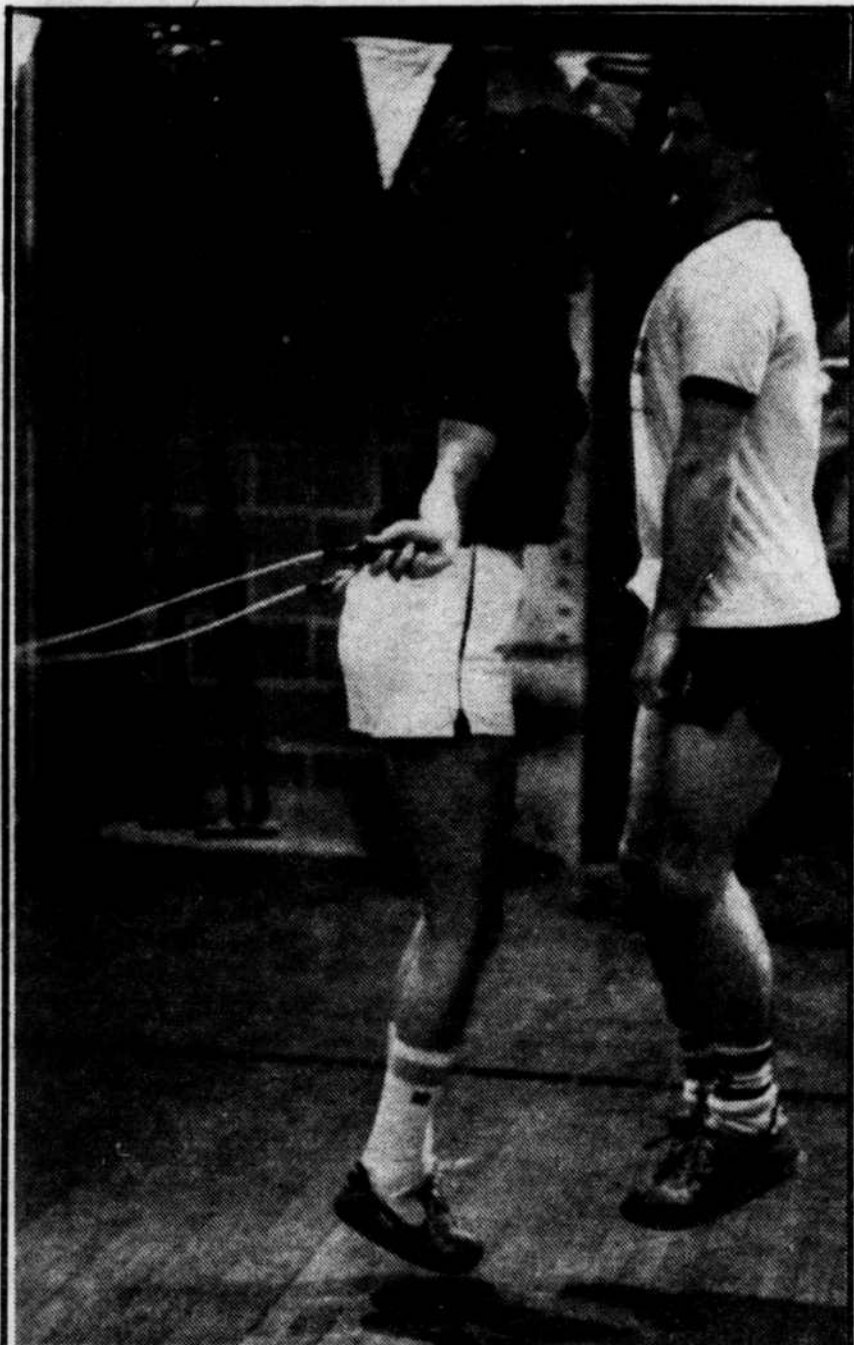

"I think there are a few Republicans who have a good opportunity to win next year, and I think I happen to be among that group," Bozzuto said.

He made a bid for the gubernatorial nomination in 1982 and lost narrowly to former state Sen. Lewis B. Rome of Bloomfield. Bozzuto also tried for the U.S. Senate nomination in 1980 and lost to James Buckley.

Another former state senator, Gerald Labriola of Naugatuck, already has an exploratory committee testing the waters for a 1986 gubernatorial bid. Labriola was also in the running for the nomination in 1982 but wound up as the candidate for lieutenant governor on the ticket headed by Rome.

Others mentioned for the 1986 GOP gubernatorial nomination include former state Sen. Russell L. Post Jr., who was the fourth contender for the slot in 1982; Republican U.S. Rep. Nancy L. Johnson of the 6th District; Deputy House Majority Leader Julie D. Belaga of Westport; U.S. Commerce Secretary Malcolm Baldrige of Woodbury; state Senate President Pro Tempore Philip S. Robertson of Cheshire; House Speaker R.E. Van Norstrand of Darien; and former state Sen. Romeo G. Petroni of Ridgefield.

At his news conference, Bozzuto said he would release a brochure on "the kind of game plan we need to win in 1986." The brochure is being distributed to Republican leaders around the state, he said.

Clothing may become taxfree

HARTFORD (AP)—The state Senate on Wednesday unanimously approved a bill eliminating the sales tax on clothing items costing up to \$50—a measure expected to save Connecticut taxpayers \$62 million a year.

"We have an uncommon opportunity to reduce taxes," said Sen. James H. McLaughlin, R-Woodbury, co-chairman of the Legislature's tax-writing Finance Committee. "We will deliver significant and immediate tax relief."

He estimated that a family of four earning \$30,000 a year and spending 5 percent of its income on clothing would save \$73 a year.

The vote in the Republican-controlled Senate was 32-0. Action on the bill in the House could come as early as next week.

If approved in the GOP-dominated House and signed by Gov. William O'Neill, the measure would be effective April 1.

It would be the first significant state tax reduction in more than a decade.

"This hits those people who are most greatly in need, those people we feel have been most overtaxed," said Senate President Pro Tempore Philip S. Robertson, R-Cheshire.

Wednesday's vote also signalled the apparent demise of the governor's proposed across-the-board cut in the 7.5 percent sales tax to 7 percent.

That was one of three unsuccessful amendments proposed by Senate Democrats. It was defeated on a party-line vote of 23-9.

Cop gets system's shaft

Joel Smith describes himself as a very old 46. His health is fragile. His spirit is bent, if not broken. And he's thinking of retiring to a quiet cabin on a lake somewhere in Tennessee.

He wasn't always like this. Only a few years ago, he was in good shape. He was physically fit and strong. He liked his job as a cop in the Chicago suburb of Rosemont.

Then one day in 1979, the radio in his police car barked that a man was firing a gun in front of an apartment complex.

Smith says that he and his partner went in, knocked, slipped their ID cards under the door, said they were the police, and told him to let the girl go.

He said something to the effect that if they came in, he could blow their rear quarters off.

They kicked open the door and crouched on either side. The man shot twice. Smith was hit in the hand and leg.

Then the man threw down his gun and surrendered.

He was Kerry Rudman, 33, and stranger to trouble. At the time of the shooting, he was awaiting trial for robbing a jewelry store in a suburban shopping mall. He also had been arrested for other mischief.

The next year, Rudman pleaded guilty and was sentenced to a total of six years in prison for the jewelry store robbery and shooting Smith.

But he served less than half of that. He was out in 27 months. And even some of that time was spent on a work release program.

There's more. Like many convicts, Rudman developed a thirst for knowledge and went to the prison library. And, like many convicts, he decided to read law books. Why don't they ever read books on criminal behavior?

He said they attacked him and that he shot only in self-defense. And they beat him so badly that they broke one of his fingers. This, he said, deprived him of his civil rights, and he asked for \$150,000 in damages.

When Smith heard about the law suit, he was outraged at Rudman's gall. So Smith sued Rudman for shooting him.

A jury agreed with Smith. They later awarded him \$35,000 damages from Rudman.

But Smith soon had further reason to be angered.

It turned out that the bottom-line boys at Rosemont's insurance company decided that fighting Rudman's civil rights suit wasn't worth the legal expense. So, the insurance company offered Rudman a \$6,000 settlement. Being no dummy, he quickly accepted. Not many guys shoot a cop and pocket \$6,000 for their efforts.

Smith, of course, hasn't seen a nickel of the \$35,000 that Rudman is supposed to pay him.

So last week, Smith's lawyer went before a federal magistrate who is handling this matter and filed legal papers that would force the insurance company to give the \$6,000 to Smith instead of Rudman.

But for some reason this angered the federal magistrate. He griped that Smith's lawyer was just harassing Rudman and his lawyer.

So, in what seems like an unusual ruling, last week he told the insurance company to write out a check to him, the magistrate.

Then he, the magistrate, could write out a personal check to Rudman, the ex-gunman. And that would settle the affair.

But if he goes ahead with it, Rudman—who is reported to have a \$40,000-a-year sales job and a house in a suburb—will get \$6,000.

And Smith, the disabled cop, will limp away to a cabin in Tennessee, knowing that all he got was the shaft.

In the State

Nuke plan approved

HARTFORD (AP)—Federal officials announced their approval Wednesday of the state's system of warning sirens around the Connecticut Yankee nuclear power plant in Haddam Neck.

Mary Hart, executive assistant to Gov. William O'Neill, called the approval "an important step" toward gaining full approval for emergency planning for the 18-town area.

In the wake of the Three Mile Island nuclear power plant accident five years ago, the federal government drew up detailed requirements for alerting residents around nuclear power plants in case of other incidents.

The state and the operators of Connecticut's three nuclear power plants have conducted tests to conform with these federal regulations since February 1982.

Asphalt is missing

HARTFORD (AP)—Contractors may have charged the state millions of dollars for asphalt that was never delivered, according to a report by the chief state's attorney's office released Wednesday.

In releasing the report, Sen. Fred Lovegrove Jr. called upon the governor to dismiss Transportation Commissioner J. William Burns. Alleged overcharges occurred before Burns was named commissioner, but Lovegrove said the report offered

proof that the commissioner operates the DOT in a "shoddy manner."

"I think the governor should seriously look at the way the department has run since taken over by Burns. I know if he were my commissioner, he would soon be gone," the Fairfield Republican said.

The report by the economic crime unit of the chief state's attorney's office focussed only on three repavement contracts awarded in 1981.

Bribe report delayed

HARTFORD (AP)—The Freedom of Information Commission ordered the state police on Wednesday to release their report on an investigation of a former prosecutor suspected of taking bribes.

But the decision was preempted—at least temporarily—by a Superior Court judge's order barring the state police from releasing the report.

The dispute involves a closed investigation of former Assistant State's Attorney Arthur M. McDonald, who is the subject of a separate grand jury probe.

"The commission authorized its counsel to take whatever legal action is necessary to enforce the order," Mitchell Pearlman, executive director of the commission, said after the session.

Pearlman said he was not sure what action would be taken.

Human rights progressing

WASHINGTON (AP)—The State Department said Wednesday in its annual report on worldwide human rights that "real progress" was made in Latin America and the Caribbean while the "most serious" problems of political repression occurred in the Soviet bloc.

Elliott Abrams, the assistant secretary for human rights and

humanitarian affairs, told reporters, "The only significant overall trend is the trend toward improvement in the Western Hemisphere."

Over the last five years, he said, nine countries have shifted from dictatorship to democracy in the hemisphere while "zero countries have gone from democracy to dictatorship."

Love saves dog's life

LA CROSSE, Wis. (AP)—A man who did not want to tell his daughter that the family pet had died dislodged a ball from his dog's throat and then applied mouth-to-mouth resuscitation to revive the animal.

Daisy, a 3-year-old springer spaniel, got a racquetball lodged behind her back teeth earlier this month.

Richard Abicht, a nurse anesthetist, and his wife Julie headed for the animal clinic. Abicht had tried to get the ball loose, but Daisy, unable to get air, panicked and bit him several times.

On the way to the clinic, "she became completely obstructed. She started to turn blue, the inside of her lips. I could tell by her eyes," he said.

His first thought was that he'd have to give the bad news to his 14-year-old daughter Jeanne.

"She was really a good dog. I knew I had to do something," he said. "I put my fingers back in her mouth after she passed out and was no longer fighting me. I was able to get one finger around it and my thumb. I pulled it out and then I did mouth-to-snout resuscitation."

Across the Nation

Talks don't look hopeful

WASHINGTON (AP)—The United States and Soviet Union will sit down to discuss the Middle East next week, but U.S. officials tried Wednesday to dampen expectations in advance by insisting they expect no change in Soviet policies.

Nevertheless, the two-day session in Vienna beginning Tuesday represents an increase in the dialogue on such troublespots as Afghanistan, southern Lebanon, the Iran-Iraq war and the Arab-Israeli conflict.

"These talks should not be seen as negotiations," State Department spokesman Bernard Kalb cautioned after announcing the discussions.

"They are merely an exchange of views," he said. "They do not represent any change in the U.S. position regarding issues affecting the region."

Fire still blazing

MANILA, Philippines (AP)—Hundreds of firefighters for a second night Wednesday battled a blaze that swept through one of Manila's largest luxury hotels. At least 24 people, including four Americans, died.

"This is going to take the whole night," said Col. Alfredo Garcia, area fire superintendent, supervising the hundreds of firemen on the scene.

Twenty-four hours after the fire started on the hotel's second floor, smoke continued to pour out of upper-floor windows on one wing of the 11-story, 464-room bayside hotel.

One fire official, Col. Rodolfo Villavicencio, said the death toll could double or triple by the time the fire finally was extinguished and the building was thoroughly searched.

Gloom hovers on capitol

PHNOM PENH, Cambodia (AP)—By the 9 p.m. curfew, Phnom Penh's streets are deserted except for the few exempt foreigners who are heading home from dinner at the city's riverside restaurants.

In the shadows, Cambodian soldiers man checkpoints. Cambodians are already laying out their sleeping mats in their shops and homes. The restaurant workers will sleep overnight at their jobs.

The darkness seems to be the harbinger of the mood of Phnom Penh's more than half-million residents, even though this capital city is making a comeback after its devastation by the communist Khmer Rouge regime of Pol Pot.

The Cambodians will tell you they have many, many problems. First it was Pol Pot, who killed hundreds of thousands of people and inflicted untold misery on the country.

Everyone gets \$166

UNITED NATIONS (AP)—The nations of the world spent more than \$800 billion for military purposes during 1984, about \$166 for every human being, according to a U.N. report issued Wednesday.

The "1985 Report on the World Social Situation" said military expenditure is growing at a rate faster than global population, which is estimated at 4.8 billion.

In the early 1980s, the military sector accounted for about 6 per-

cent of total world domestic product, employing 50 million people, including 500,000 scientists and engineers.

It said most of the military spending was done by six nations, the United States, the Soviet Union, Britain, China, France, and West Germany. But between 1974 and 1983, the report said, military spending by developing countries increased by twice the rate of increase in the industrialized countries.

Researchers worried about grants

By Colin Poltras
News Editor

A move by state legislators trying to monitor the use of federal funds for research projects here won't take the money out of the hands of the university, but it will probably delay its arrival.

The issue surrounds about \$1.5 million in indirect funds which are left over from research grants and are currently monitored by UConn's Research Foundation. The foundation usually takes that money, which is used to buy support equipment and pay for grant personnel and utilities for projects, and distributes it to needy faculty on the basis of applications for necessary study.

There are currently two bills before the state legislature, one is trying to increase the state's control of the indirect funds and the other is trying to give the legislature complete control over all federal funding to UConn research projects. If they are

passed, officials here are worried their programs will get bogged down in government red tape.

Fred Burke, UConn's director of research says that 99 percent of the time the money would be allocated to the same place except that now, as in the past, the state would like to see where it is going.

For nearly ten years the state has been trying to push federal grant money through the legislature before being appropriated to different research studies. Although they have failed in the past, Burke says that the newly elected legislature poses a new problem and the university is doing all it can to show the administrators that the money is being spent properly.

"There has always been legislation that says that the money should be sent straight into the state legislature and not to the specific areas themselves," Burke said. "They would rather have the money

appropriated through committee, than allow it to pass on directly to an institution.

The university received about \$40 million in federal grants for research last year and UConn is ranked in the top 40 for research institutions in the country. That probably won't change if the new bills get passed, but it will probably make it a lot more difficult to retain that status, Burke said.

In explaining the situation, Burke said that the federal government gives the university 100 percent funding in its grants, 10 to 50 percent of that money is set aside for indirect costs, of that figure, 10 to 12 percent is sometimes left over from a project.

The state usually has no quibble with the 50 percent used for the research itself but it is the extraneous money that has created the desire to strengthen control at the state level, Burke said.

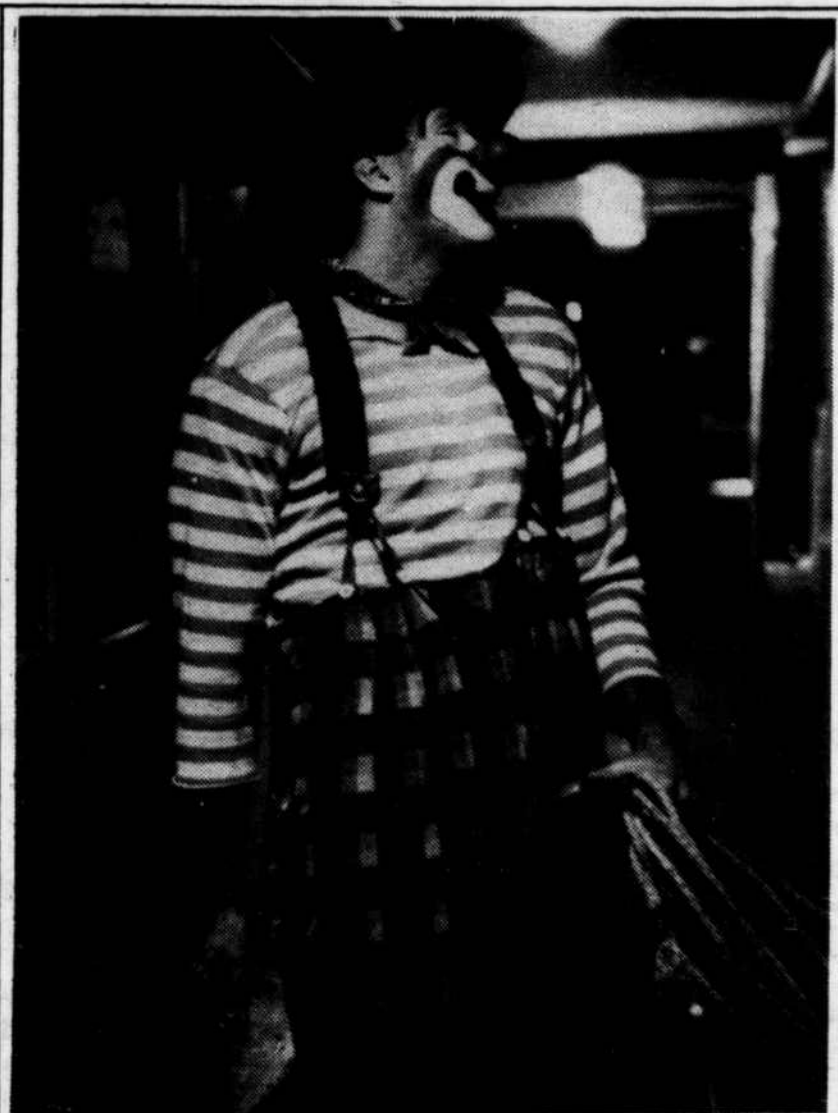

Dentists start aid program

FARMINGTON—The Friends of the UConn School of Dental Medicine, a group of about 200 dentists from throughout the state, has given the school \$10,000 to start an endowment fund for student aid and educational purposes.

Dr. Robert G. Levine, a West Hartford dentist and president of the Friends, said there will be a continuing effort by the organization and individual members to build the fund. Guidelines have not yet been set for the specific use of the endowment proceeds.

USG debates action on information bill

By Paul Parker
Associate News Editor

One representative slammed the door in disgust as he left the student assembly meeting room Wednesday after debate was squelched on a resolution against student governments being covered by the state's Freedom of Information Act.

Another called the vote without discussion a "rash" act, but the two were in a 13-2 minority as the Undergraduate Student Government passed the resolution.

Pat Gawkins, chairman of the academic affairs committee, proposed the resolution to the executive committee Tuesday saying, "we don't need a parent in Hartford breathing down our back."

Wednesday Gawkins prefaced his proposal, "the question addressed by this is whether or not we (USG) are a sovereign government."

The measure is in opposition to a state House of Representatives bill which was proposed by Rep. Jonathon Pelto (D-Mansfield).

The bill, whose wording is not finalized, would require that student governments at public colleges and universities follow state open record and meeting statutes.

The resolution and Gawkins' opening remarks attacked Pelto for introducing the legislation.

Student government leaders said it was their understanding that if they passed their own act similar to the FOI Act, then Pelto would withdraw his legislation in Hartford.

Pelto said last month that this was a misunderstanding. The Mansfield Democrat said he had said it would be a "good faith" act for the student government to pass such a measure, but it would not affect his efforts in Hartford.

In Wednesday's resolution, the student government said that Pelto's legislation "unfairly singles out student government in an effort to carry favor with the Daily Campus."

Pelto said, "As representatives from the 54th district, it's my responsibility to represent the concerns of all the citizens."

Michael Gimbrere, who left the meeting room, and Jennifer Rienks, who also opposed the resolution, sought to table the motion until after a meeting Tuesday with a member of the FOI Commission's staff.

Pelto organized the meeting in order to get expert input on the implications of his bill and to assess the concerns of all those involved.

Besides student government leaders at this campus, leaders from regional campus governments, university administration and editors from *The Daily Campus* were invited.

Enrollment down at state colleges, universities

HARTFORD.—Enrollment this fall at Connecticut colleges and universities dropped 1.8 percent from last year to 161,245 students according to final figures released Wednesday by the Department of Higher Education.

Declines at the two-year public institutions and four-year regional independent colleges were major factors.

Within the public sector, the University of Connecticut at Storrs and Connecticut State University maintained steady enrollments. Overall declines occurred at the UConn branch campuses, regional community colleges, state technical colleges and UConn Health Center.

Full-time equivalent enrollment was down 2.6 percent. This common measure is

based on the total number of credit hours for which students register.

At public colleges and universities, excluding the U.S. Coast Guard Academy, headcounts fell 1.9 percent to 99,601 students, due mostly to losses at the two-year colleges. Independent institutions posted a smaller drop of 1.3 percent, enrolling 60,859 students.

For the first time since 1976, undergraduate enrollments dropped, with 2,990 fewer students than last year. Those enrolled part-time declined for the first time ever, down by 2.3 percent. Full-time enrollments continued their decline begun in 1982. Graduate enrollments had little change.

"Enrollments this year reflect our projected pattern of gradual declines that will last well into the 1990's" stated Norma Foreman Glasgow, commissioner of higher education. "The shrinking pool of traditional-age students is being felt statewide."

... Budget increase

From page 1

Attracting first rate graduate students would also help the university to receive more beneficial research grants, Fred Burke, director of the Graduate studies program here said. "You have to compete for good grad students, just like we compete for good faculty," Burke said.

"The numbers and the dollars are small, but the impact on the program is not," DiBiaggio said. "UConn is presently among the top 40 research institutions in the country and the president said that 'maintaining this edge is centrally important' if the university is to keep that position."

DiBiaggio also stressed the

need for an 8.3 percent increase in the budget for the

Homer Babbidge Library in order to better the university's supply of books and periodicals. The president said the request stems from the need to replenish the university's supply which has been cut about 20 percent due to inflation over the past 10 years.

If these requests are added to the Governor's revised edition of the university's budget, the total budget for UConn next year could be \$103,892,782.

The budget still has to be voted on by the appropriations committee and later by the General Assembly before it is finalized.

"Connecticut's healthy economy also is a factor," Glasgow added. "People are less likely to seek retraining and upgrading opportunities when jobs are more readily available."

Glasgow cited the drop in the enrollment of older students as "particularly significant" in explaining losses at the part-time undergraduate

level.

In the independent sector, enrollment grew at the four-year national institutions (Connecticut College, Trinity College, Wesleyan University and Yale University) but declined at the regional institutions. Overall growth at the two-year colleges was due to gains at Briarwood College in Southington.

Campus center offers help to disabled students

By Lynne Eichner
Campus Correspondent

The office is open and bright; the partitions are made of cut glass and the ceiling is high. Anybody can come into room 103 Commons without feeling closed in, whether they are in a wheelchair, have a guide dog or are walking with crutches.

Room 103 is where the Disabled Student Services Center is located. The Center, operating since 1971, serves approximately 350 students, about 35 of whom are frequent visitors.

"We try to be a place where someone could come and spend an hour or part of their day," says Rita Pollack, the Center's director.

But the Center is more than a place where disabled students are welcome to spend time. Pollack, her secretary, three work-study students and several volunteers provide an array of services to any

permanently or temporarily disabled student at UConn. The services range from moving a class out of an inaccessible building to arranging temporary parking for students recovering from surgery.

A frequent visitor at the Center is April Hutchins, who comes with her guide dog Annie. The Center guarantees Hutchins' classes ahead of time so she can learn the route from her dorm to the classroom. Hutchins also has to get all of her required texts on tape.

In addition to guaranteeing schedules and housing for students, the Center also makes arrangements for alternative testing procedures, elevator keys, tutors, counseling, physical therapy and van service for transportation.

One of the Center's tools to help students like Hutchins is a microcomputer equipped with a voice output. The artificial voice will immediately tell

a student which key has been pressed and will also read back completed paragraphs.

Pollack is enthusiastic about the computer because it gives visually impaired students a way to write and type their own papers.

Pollack hopes that the voice output can soon be used with terminals at the computer center so disabled students taking computer science courses can complete their required course work.

Pollack is also a member of UConn's 504 Transition Committee. All institutions receiving federal funds must establish this committee, which is responsible for getting the University into compliance with federal accessibility standards for handicapped students.

Phase II of the transition plan developed by the committee is now nearing completion. Modifications to elevators, doorways, curbs, and toilets have been made in the

14 buildings most used by disabled students. These include the Budds Building and the Field House.

Phase III, which will begin this fall, will make Jorgensen Auditorium, the Benton Museum and the Drama/Music buildings accessible. This phase of the plan also calls for additional improvements to the Chemistry and Pharmacy buildings. The plan's fourth phase provides access to Storrs Hall and the Jones Building.

Improved accessibility and commitment to "mainstreaming" disabled students in

secondary schools have both helped to increase the number of disabled students at UConn, according to Pollack.

But, in spite of all the improvements, there are still plenty of difficulties. Hutchins said that special hazards for her are low tables in unfamiliar places, doors left partly open, turnstiles in the library and the Co-op, and cafeteria lines where plates and silverware are in different places every day.

Hutchins said her biggest problem isn't accessibility to buildings, but to other students.

Valentine's Day can be depressing for some

SIMSBURY (AP)—Valentine's Day evokes images of love, flowers, cards and sweets, but for many people the day emphasizes the pain of a loss or an unhappy relationship, a marriage counselor says.

Valentine's Day is in many ways, an artificial day people are expected to express their love artificially, said Dr. Ingeborg E. Haug, a Simsbury marriage and family therapist and president of the 398-member Connecticut Association for Marriages and Family Therapy.

"You cannot really institutionalize love. Some words do not do away with the pain," she said. "In a good relationship, people express their feelings all through the year."

"One day does not make up for the rest of the year," Mrs. Haug said.

She said that to institutionalize love on one day, focusing on what they do not have, rather than on what

they have, makes many individuals see the deficits in their relationships.

"This is not to say that couples should not set specific times to care and nurture relationships," she said. "But those should come at natural times throughout the year."

Mrs. Haug explained that although Valentine's Day does not bring out the stress and depression of the type often associated with Christmas and New Year, it does reinforce unrealistic "romanticized notions" of the sexes.

Women who are single, but not by choice, will be most affected by Valentine's Day.

"For women, it evokes fantasies of oneness, fusion with a lover. For many women, to have a relationship is crucial. Woman tend to feel incomplete without a man," she said.

Many men, in turn, while not needing relationships as much, want to be the white knight, Mrs. Haug said.

Mrs. Haug stressed that

relationships cannot flourish well, unless individuals can feel good about themselves and develop their own lives.

"Individuality is important, and relationships must in-

clude this while retaining mutuality, respect and responsiveness to each other's needs," she said.

Mrs. Haug also suggested that couples set the day aside

and use it to sit and talk about the relationship the expectations that have not materialized and the expectations of each other - "a marital health day," she called it.

Elderly sweethearts tie the knot for the third time in 61 years

LINCOLN, Ill. (AP)—Cupid's arrow has hit Mary and Desmond Weindorf yet again, and the couple, in their 80s, plan to end their latest divorce on Valentine's Day and marry each other for the third time.

"Maybe we'll get it right this time," says Weindorf, 85. After the wedding Thursday, Weindorf will move into his new bride's room at the nursing home here where they now have separate rooms.

Mrs. Weindorf, 84, says she plans to "nag" her husband as much as necessary.

"I wouldn't feel married if I weren't nagged," said Weindorf, who in his working days was a state police motorcycle trooper, county and state engineer and local political activist.

The couple were first married on Valentine's Day in 1924 and since then have been married a total of 37 years and divorced 24, said Sue

Neavill, 40, the youngest of the couple's four living children.

"The reason I finally decided to go along with the third wedding was because I realized they never loved anybody else," said Mrs. Neavill, herself a grandmother.

The two were acting "like a couple of 20-year-olds. Dad's been very sweet around mom," she said.

The Weindorfs are the oldest couple to take out a marriage license in Logan County—and were the oldest to have won a divorce when they were granted their second in 1972, Mrs. Neavill said.

She said numerous Lincoln merchants, as giddy over the wedding as the bride and groom, have donated "everything you need for a wedding."

Ex-soldiers make the transition to college life

By Derek Gray

Campus Correspondent

They've seen things that most college students haven't watched anywhere but a movie theater. Dave Warner and Scott Glennon have seen 13-year-old prostitutes and starving people with worms in their stomachs.

Warner, 26, and Glennon, 27, are two of about 680 UConn students who have served in the U.S. military before entering college.

Glennon was stationed in the Philippines during his five years in the Air Force. Warner served four years in the Army and was stationed in Panama

and Germany.

They both work at UConn's Veterans Center now, but they are having problems adjusting to college life. Both vets said that their classmates' problems seem insignificant compared to what they've seen in the military.

"I had a hard time making

people understand that after seeing starving people, I can't stand to throw food out," Warner said.

John Ryan, 19, now a second semester student, has also had some difficulty in adapting to college. "Everyone wears camouflage clothes. It's the rage," he said. "But they don't know what it was like."

Warner agrees. "They (students) think it's fashionable," he said. "To me, it was a battle uniform."

Ryan, who spent two years in Germany with the Army, said that it was rough, but worth it. "The first day of basic training they were screaming in my face that I wouldn't last a day," he said. "I looked at it as a mind game. Just not being beaten was winning."

So why was the physical

and mental stress worth it? Ryan gets a check for more than \$600 from the U.S. Treasury every month. He said that the checks come on the last working day of every month and will give him \$15,200 towards college expenses.

In addition to the money, Glennon, Warner and Ryan value their time spent overseas the most. "I wish everyone could go to a third world nation," Warner said. "Most Americans have a distorted view of the rest of the world."

Despite the adjustment problems, Warner, Glennon and Ryan value their military careers because they had the chance to travel abroad and see some of the "real" world before continuing their formal education.

Longer lives today result in more people with cancer

NEW YORK (AP)—One in three people born this year will eventually develop cancer, chiefly because they will live long enough to reach the ages when cancer is more likely, the American Cancer Society projects.

About 22 percent of those born this year are expected to die of the disease.

The projection that one in three people will get cancer is up from about one-in-four previously calculated for people born in 1970, essentially because of increased life expectancy, Lawrence Garfinkel of the society said Wednesday.

Long-term declines in death from the nation's top killer - heart and blood vessel disease - have let more people live long enough to get cancer instead, he said. That is reflected in the projection, which uses cancer rate data from past years.

The projection assumes no change in cancer rates, but if enough people quit smoking or adopt diets that help resist cancer, the actual cancer rate could be lower than projected, Garfinkel said.

For people born this year, the projection says, the chance of developing cancer someday is 36.2 percent for white males, 34.0 percent for white females, 34.7 percent for black males and 29.2 percent for black females. Figures exclude two highly curable forms of skin cancer.

The most common cancers in the projection are lung, prostate and colorectal for men, and breast, colorectal and lung for women.

The society's projection considers lifetimes up to 110. "There's very little of the upper end" that contributes to the data Garfinkel said.

The study is published in the current edition of the society's journal *Ca*.

The National Cancer Institute has published an estimate based on dates from 1973 to 1977, saying anyone alive at that time had a 30 percent chance of developing cancer by age 75. The cancer society says a 30 percent

figure means about 71 million Americans now alive will have cancer someday.

The society recently estimated that about 462,000 Americans will die of cancer this year, accounting for one in five deaths in the nation.

The current overall rate for

surviving five years beyond diagnosis is nearly 50 percent, Garfinkel said. Some individual cancers have higher rates, such as 96 percent for breast cancer that has not spread to other parts of the body. If it has spread, the rate is about 70 percent.

Teaching must preside

This is the second in a series of editorials on the University senate subcommittee report on the Intellectual and Cultural quality of Undergraduate Life at Storrs. Today's editorial looks at the subcommittee's findings on UConn faculty.

It is not easy to look critically at yourself but that is what the University Senate did in its report on the Intellectual and Cultural Quality of Undergraduate Life.

The University Senate is saying that research has been overplaced and overly praised. Teaching, the Senate, says must preside research as a university responsibility.

This is true, and faculty must insist on the primacy of teaching. We cannot assume that plentiful and competent research is evidence enough of teaching skill. And it is said that good teaching will take care of itself. This is false. Good teaching takes work.

A problem that has yet to be mentioned is the fact that for far too long this state and our parents have seen UConn not as an investment but as a taxpayer's expense. The end result is that the university has not had the money to hire new and younger professors.

Junior faculty for the most part have more contact with students than their older peers, but, unfortunately, because of retrenchment, this university has been left with an older and older teaching staff. But, a professor (old or young) cannot be a good teacher unless he or she cares about students. This is not a myth. But, because it came to be disbelieved, the campus scene has suffered.

The trouble with many college professors is not that they do not listen with sympathy and concern; it's that many don't listen or care at all. And too many treat students not as adults but as their own children.

A combination of steps are in order. First, we should place more emphasis on teaching ability than on research when hiring prospective new teachers. Secondly, we should provide bonuses for teachers considered by their superiors to have performed well and who have participated in extracurricular activities with students and lastly, we should place higher standards for the hiring and retention of administrators who are responsible for setting the curriculum and tone of teaching.

The point is not to berate the faculty here. The point of interest here is to note how large a burden of responsibility for campus malaise rests on the failure to be humane.

And the further point is that though all citizens of the university—students, deans, campus police—are party to this failure, those whose work is most seriously compromised by it are the teachers. They have got to listen and they have got to care.

Take advantage of campus events

To The Editor:

Recently I read the New York Times article "UConn Report Scorns Intellectual Poverty" (Feb. 10, 1985). Faculty members were quoted in the article as having said that they (faculty) often did not invite guests to speak because of the predictably low turnout.

There is not a week that goes by where I don't hear a student complain about nothing to do on campus. I am a transfer student who lives on campus and I am unable to get home on weekends. There are so many activities that you can get involved with on campus, and many chances for students to combine both studies and cultural/sporting events while at school.

There is a variety of things to do and various social events, shows at Jorgensen Auditorium, activities sponsored by the Board of Governors, movies and concerts at Von der Mehden, and free art exhibits at the Benton Museum, not to mention the numerous activities at the Field House.

Another example of low turnout among students at events is the Trans Lux College Theatre which offers students top-rate movies at only \$2.00. But the theatre is presently finding themselves financially unstable due in part to the lack of student interest.

If students do not start attending events then slowly fewer and fewer activities will be planned, and students will really be left with nothing to do. Students should make more of an attempt to take part in what they've got instead of complaining that there is nothing to do. I see plenty of information concerning campus events on posters and brochures around campus advertising what is going on. The Daily Campus always advertises for events at Jorgensen Auditorium, Nutmeg Theatre and the Trans Lux College Theatre.

I recently went to Jorgensen Auditorium to see the hypnotist James Mapes, and overheard

people say that it was the first time they were ever in the theatre. I can't believe that students do not take advantage of cultural events, and do not take time to learn more about the arts.

Cultural events on campus do not just consist of classical music but performances that include ballet, jazz and modern dance, Broadway shows, theatre cabarets and soon. UConn also sponsors sporting events and other recreational activities that are all located in walking distance on campus.

If you would just take a few minutes of your time to find out what's going on, you'll find yourself busier than you ever thought, and chances are you'll like it.

Alan Carlson

Keep our chins up

To the Editor:

Almost always there is a way to turn a negative experience into something positive. So it is with the New York Times article on UConn's intellectual poverty (Feb. 10, 1985).

I was home this past weekend (yes I am guilty) and had a chance to see the Times article firsthand. Since Sunday, I've noticed some of the reactions in my dorm. Most students generally agree with what the article said. There is no denying that some of it is true, but if we agree too quickly we will fall into a rut. If we disagree too much we will miss a problem that needs to be addressed. This controversy has at least shown that students are concerned and if it improves relations between students and faculty, all the better.

Rather than place the blame on others it is important to recognize what may need improvement within each of us as students or faculty members. We should also realize that there are some good things to say about UConn. Starting with friends and family, we should put in good words about UConn. Our reputation would improve and thus so would

the state's funding. As alumni of the future we would also find more doors opening for us.

This controversy like the rainstorm that came with it may leave its damage, but the air will be fresh and the ground clean. It is up to us to make sure that drains don't clog up. Let's keep our attitudes positive and let the negatives wash away.

Dan Schwartz

BOG receives no funding

To the Editor:

Your February 13 article on WHUS and USG fee increased states that "the Student Union Board of Governors (BOG) receives its funding from student activity fees, just as the student government does... and House Bill 6679 (Freedom of Information) is inconsistent because it does not seek to include the Student Union Board of Governors."

Actually, the Student Union Board of Governors receives no funding at all. The Student Union fees goes to the University, not to BOG. We are an advisory group, and we don't spend any money. We recommend expenditures to UConn's Director of Student Activities and Union Programs, and he may either approve or not approve our recommendations.

Matt Grandonico State colleges stand to lose

President Reagan's proposed budget for fiscal year 1986 will affect the structure of higher education in the state. Connecticut congressmen John Rowland (R-5th), Bruce Morrison (D-3rd), and Sam Gejdenson (D-2nd), all strongly oppose the president's proposed budget cuts in financial assistance to students. Gejdenson states that he will "do everything he can" to block his proposal cuts for he believes that they will work against a prosperous future for the United States.

Under Reagan's proposed budget, the state of Connecticut would lose approximately \$5.86 million in educational funds. The largest part of this would result from the stipulation that families whose net income was over \$32,500 would not be eligible for student aid. It is estimated that 20,000 Connecticut students would be affected by this cap.

Furthermore, the second largest cut would originate from a \$4,000 annual aid cap to students. This would affect 20,200 Connecticut students. When most private universities and graduate schools cost well over \$8,000 annually, how is a student supposed to come up with \$4,000 in a period of 31 months? These cuts would have a net result of lowering the education level of the United States in the long run, for most people will simply not have the funds to attend graduate school.

This is a clear indication of Reagan's policies once again favoring the affluent. Some students do not have to worry about school payments. For others, the ones who work around campus at Ted's, Huskies, desk jobs, or who waiter or waitress for the minimum wage, the payment comes out of their own pockets, from student loans or partly from their parents. These people will be affected the

most by the cuts.

There are many families in Connecticut whose income is over \$32,000 who simply cannot afford to foot the entire bill for school. Yet, Reagan is impervious to all of this. Reagan's proposed cuts in education coupled with the fact that there is a 13 percent or \$31.9 billion increase in military spending is another paradox of his administration.

And harsh feelings concerning Reagan's budget are not limited to only Democrats. Republican Senator Lowell Weiker for example is also "very disappointed" with the priorities of the proposed budget, and even at this early stage is calling for defense cuts.

In addition, Republican Representative John Rowland, the youngest member of congress at this time, "strongly opposes" Reagan's budget plan and believes that his proposal "will simply not fly." Though most Connecticut congressmen are opposed to the proposed budget, no one would specifically comment on how one would go about blocking the proposal or amending the proposal. For the sake of higher education in Connecticut, many hope that the representatives in Washington do everything in their power to stop Reagan's education cuts.

With 82 percent of the budget cuts of fiscal year 86 coming from a reduction in social spending, juxtaposed against a 13 percent increase in military spending, Reagan's priorities are certainly confused. An educated, talented well informed populace is the best weapons system we as Americans possess. It is a shame that Reagan is proposing to cut one of our nations most valuable weapon—knowledge.

Faculty: Retrenchment has had its effect

This is the first in a series of five excerpts The Daily Campus will publish from a report of the University Senate sub-committee on the Intellectual and Cultural Quality of Undergraduate Life at Storrs. Today's excerpt is from findings on UConn's faculty. The New York Times Sunday based a story on this report.

The University of Connecticut, like most good state universities, has a faculty that for the most part is capable of intellectual excellence. As currently composed, it is fully competent to wipe out grade inflation and to impose serious intellectual standards upon the curricular aspects of undergraduate life.

However, the Subcommittee's interviews made it clear that the curricular level is not the area of most constant and widespread concern. The most universally voiced complaint was that the heightened intellectual and cultural atmosphere that faculty "role-models" presumably would provide is missed by the students because in general the faculty does not engage in social, extra-curricular exchange with students. Apparently, with some notable exceptions, the faculty does not have any significant campus presence outside the classroom and the laboratory. The most consistently felt need was for a totally revitalized and effectively working advisory system for academic concerns and for student organizations, for much greater faculty availability to students, and for many more extra-curricular times and places in

'Time and energy spent in advisory and extracurricular functions do not result in rewarded prominence'

which faculty and students meet. In sum, in its teaching-advisory function and in its function as intellectual and cultural model, the faculty closes its office doors and is only sparsely available once the assigned classroom time is finished. There are several glowing exceptions to this in the undergraduate curricula where (1) the faculty is generally available to students because school-space is where the faculty's research as well as teaching facilities are, and (2) undergraduate education already is professional education, so that teacher-student relationships and scholastic standards are equivalent to what in non-professional undergraduate education is reserved for the professional level and relationships of graduate school.

However, although the administrators, faculty, and students involved in the Subcommittee's discussions all agreed about the advisory function, a total assignment of blame to the faculty would be as misdirected an oversimplification of the problem as has been the hitherto implicit total exculpation of students.

Faculty advisory participation in student organizations is a legitimate part of the teaching function and is a very important part of improved faculty-student relations in a strengthening of undergraduate intellectual life. But extracurricular undergraduate student organizations centered on areas of faculty professional expertise in non-professional undergraduate curricula (a French club, a Math club, a Philosophy club) generally have brief half-lives dependent upon the occasional presences of unusually interested and motivated student leaders whose energies animate the organizations during the undergraduate leader's time on campus. A more dependably ongoing extra-curricular organizational life depends upon consistent faculty expenditure of attention.

Time and energy spent in advisory and extracurricular functions do not result in rewarded prominence. As a teacher, a provider of service, and a researcher, the university-level faculty member finds that on the institutional and professional levels there are few incentives to spend time and energy on the advisory and extracurricular functions, and until universities can devise institutional measurements, rewards, and recognitions for such functions, exhortation for change will be ineffectual. This problem, in which the institution is at odds with itself, is typical of all universities, which have professional, graduate, and wide public obligations and functions not incumbent upon lesser or smaller institutions of higher education. Until some way is found to adapt a function particularly appropriate to the small college to the realities of large universities, especially state universities, the demand for an increased faculty attention to advisory and extracurricular work will remain an institutional anomaly.

One other common complaint about the faculty and the level of intellectual activity at the formal, curricular level centers upon the use of lecturers and teaching assistants who do not have the experienced skills or professional expertise of seasoned fulltime faculty. These complaints become especially bitter when they are aimed at (1) huge, mass-enrollment lecture classes, and (2) the use of teaching assistants whose command of English is poor enough to cause real problems of comprehension and communication.

The constant pressures of retrenchment for too many years has resulted in a net loss of positions and in a noticeably damaged ability to compete for first-class graduate student teaching assistants. The net loss of positions has created some situations in which core curriculum teaching is left to lecturers and teaching assistants. There is no budgetary room for educational reform in this area, nor for educational exploration, nor for innovation generally. In the necessary and inevitable attempts by departments to save what's left of upper-division and graduate work, the 100s sequences suffer. Consequently everything and everyone suffers. Simply put, retrenchment debases the quality of student intellectual life.

Of Dr. Caligari and burned sheep

monsters and portents

"The Cabinet of Dr. Caligari" is a classic silent German horror film. Made in 1919, it reflects many of the revolutionary views of society and authority which were burning throughout post-WWI Germany.

The film's images are a pure reflection of the avant-garde German Expressionist movement. The sets were made by three Expressionist artists and are acid-like in their hyper-realism. Nothing is made in a straight line, everything is exaggerated, shading explodes over sets.

The horror film is about the insane and evil Dr. Caligari. The story of Dr. Caligari is

narrated by a young man, Franz, to the director of an insane asylum. Franz is at the asylum to visit his old love who is a patient there. The story he tells is this.

Dr. Caligari is a showman who exhibits a sleep walker in his sideshow at town fairs. In his show, he wakes up his somnambulist and uses him to predict the future of people in the audience. The somnambulist predicts the death of a person in the audience who asks him his future. This zombie-like creature of Caligari's is then sent out at night by him and ordered to murder the person whose death he foretold.

Dr. Caligari is tracked down by Franz and discovered to be the director of an insane asylum. Franz exposes him as insane and has him thrown into a straight jacket and put into his own asylum.

At the end of Franz's narration of the story of Dr. Caligari, Franz realizes that the person to whom he has just told it to is none other than Dr. Caligari. Franz is seized by the workers in the asylum as he madly accuses the director of being Dr. Caligari. He is then thrown into a straight jacket in the same setting and manner as was Dr. Caligari earlier in the film. The film ends on this ironic crack.

The idea in this film is that authority is mad. The line between who is insane and who is sane is questioned and then radically erased. This is a great film which captures in its revolutionary idea of doubting authority and its use of expressionist sets, the spirit of Germany's early avant-garde.

So okay, you say you're angry. You're angry because a

group of hemorrhoidal professors, with their report portraying UConn students' cultural interests as alive as burned sheep, have just ruined your chances of ever putting on airs instead of always passing gas. So what if those out-of-touch, surrogate parents do not appreciate the artistic patterns made by urine and vomit on snow after a hard Thursday night.

Well show them they're wrong and go to the silent German films shown every Wednesday night at 7:30 in Montieth 143. They are free, they are imaginative, and they are pleasantly introduced by Herbert Lederer, professor of German. The next film will be shown on Feb. 20th. It will be "The Golem," a horror film which served as a prototype for "Frankenstein."

Center Space exhibit

Center Space will present a series of unusual and provocative contemporary art installations, throughout 1985. In the past few years, the Civic Center Mall has emerged as a focal point of downtown Hartford's business and social activity. So it is fitting that it not only offer the public fine shopping, dining, performing arts and sporting events, but also visual art that is virtually unavailable anywhere else in the region. Center Space is now the only gallery in Central New England with the capability of presenting large scale art works. In this sense, it may be unique to the nation and serve as a pilot for the integration and exhibition of provocative new work in a public setting. Few communities can boast of temporary public art installations with a commitment to new work and oftentimes work developed specifically for the public site.

The sixty-foot sky lit atrium offers the artist the opportunity to realize works not possible in most settings. The art exhibited in Center Space Gallery can be viewed from 3 atrium heights. It is anticipated that the average pedestrian flow through the gallery during the six week exhibition period of a show will be in excess of 150,000 people.

Real Art Ways, a New England contemporary art center, celebrating its 10th year anniversary, will create the series in conjunction with the Civic Center Mall. Patricia Reville, RAW curator stated, "We have selected a challenging variety of projects to initiate this important series. The art work will present both the artist and the public with the opportunity to address serious contemporary art outside of the museum or traditional art environment."

March 1, 1985 marks the inauguration of Center Space with the "Omega Project" a monumental installation by Philadelphia artist, Gary Robbins. "Omega Project" consists of a multi-colored and many faceted, forty-foot tower, which will present the viewer with several layers of visual as well as contextual information. The project is based on aspects of Omega as referred to in the *Book of Revelation*. The main tower is comprised in part of a seven-headed beast, with ten horns surrounded by twenty-four thirteen-foot-tall thrones each topped with gold crowns. From a blue triangle affixed to the Civic Center's skylight, a thunder bolt spanning sixty feet will extend to the tower below.

Robbins is an installation/performance artist who presently resides in Pennsylvania. He has had one-person shows in Philadelphia, Chicago, and Washington, D.C. and has performed on National Public T.V. and National Public Radio. His ensemble, the Inter-Arts Collective, recently received a grant from the National Endowment for the Arts.

COOKED BEER VS. FRESH BEER.

Back in the days when boxers fought with bare knuckles, there was no such thing as bottled beer or beer in cans.

Those were the great days of draft beer, fresh from the keg.

Like the draft they brewed at Frederic Miller's old Plank Road Brewery. It had a smooth, fresh taste that just got better, round after round. Like those early pugilists themselves.

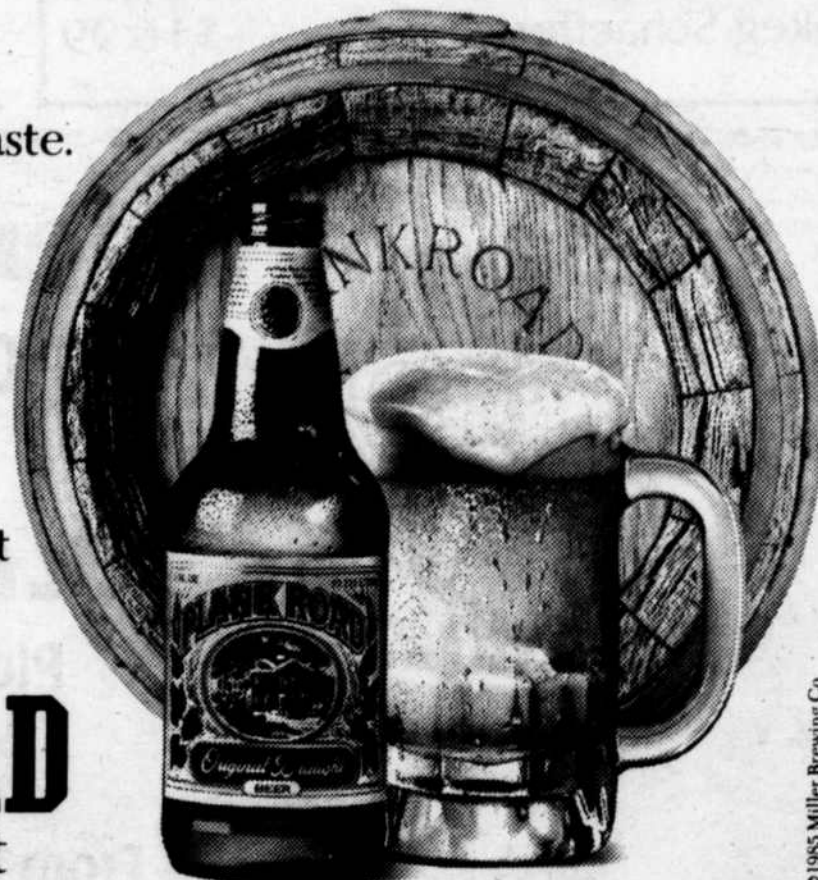

A taste that's hard to find in today's bottles and cans. Because most beers, in bottles and cans, are pasteurized.

Cooked to 140 degrees to preserve their shelf life. So they lose that fresh, draft taste.

But now there's a bottled beer that's not cooked. It's specially cold-filtered instead. To keep the true taste of fresh draft.

Introducing Plank Road Original Draught. It tastes as fresh from the bottle as it does from the keg.

Oxbow Press exhibit

Offset prints from the Oxbow Press will be exhibited at The University of Connecticut's Atrium Gallery Feb. 11 through March 1.

The exhibit of 20 prints by various artists will be augmented by a gallery talk and workshop led by featured artist, Hanlyn Davies, a University of Massachusetts professor, is one of five artists who in 1979 started Oxbow Press, a commercial printing operation.

"In offset printing, a photographic or hand-drawn image is applied to an aluminum plate that is mounted on one of three main cylinders of the press. After the plate is inked, the image is transferred onto the immediate cylinder, which has a thin rubber cover. This rubber surface then is the one that transfers or prints the image on the paper, which is passed through the press," says Sal Scalora, Atrium Gallery director.

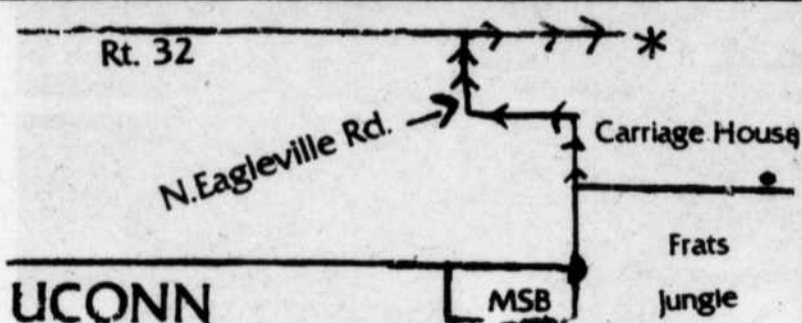

"I enjoy the fact that there's something opportunistic about my involvement with offset," says Davies.

"Most appealing is the idea of plugging into an existing sophisticated system (the commercial printing industry) with its established procedures, any of which may be used, modified, perverted, or discarded in order to achieve desired images," he says.

Back to back concerts at Von der Mehden

Three University of Connecticut musicians will perform in a free percussion-piano concert on Feb. 18 at 8:15 p.m. in the Von der Mehden Hall on the UConn campus.

Percussionist Martin Kluger will join Mirian Charney on the piano and Jane Polanski on the marimba to present music by Aleander Lepak, Alan Hovhaness, Steve Reich and Darius Milhaud. A piece by Kluger entitled, "Dawn-Death" and described in the program as "5 haiku images for solo percussionist" is also scheduled for the evening.

Kluger, who teaches percussion in UConn's Music Department, is principal timpanist with the Springfield Symphony.

His New York City-based career has been enhanced

with summer performances at Yale University's Norfolk Festival, the Berkshire Choral Festival and the Pops Orchestra of the Sacred Heart Cathedral with which he toured as head percussionist. He recently was a featured soloist with the Springfield Symphony.

Charney, a UConn lecturer in vocal accompaniment, is principal repetiteur and assistant conductor for Connecticut Opera. She also is assistant music director and pianist for the Opera's touring ensemble, Opera Express.

Polanski, a UConn master's degree candidate in music education, has performed with the Holy Cross Wind Ensemble, St. James Chamber Players and Worcester Philharmonic. She is a member of the UConn Wind Ensemble, Percussion Ensemble and the University Orchestra.

Mary Lou Rylands, cello; Leonard Seiber, piano and Phillip Isaacson, harpsichord will perform Feb. 19 at 8:15 p.m. at a free concert which is part of the music department's Faculty & Friends Series, at Von der Mehden Hall at the University of Connecticut.

Pieces scheduled for the concert are: Sonata No. 2 in D Major by Bach; Sonata for Violincello Solo, Op. 25, No. 3 by Hindemith; Suite populaire Espagnole by Manuel de Falla and Sonata No. 2 in D Major, Op. 58 by Mendelssohn.

Rylands, associate professor of music, has performed in numerous chamber music series including the Sea Cliff New York Chamber Series, and the Morse Chamber Series at Yale. She received her degrees in cello performance from the Oberlin Conservatory and Yale University.

Seiber, professor of music, has performed solo recitals in many major cities. His long career of teaching and performing has earned him a reputation as a champion of 20th century American music.

Isaacson, organist and choirmaster of Christ Church Cathedral in Hartford, directs the Children's Chorus for the UConn Community Music School. A graduate of the Oberlin College Conservatory of Music and the Yale University School of Music, he was the recipient of a Fulbright Grant to Germany. There he studied organ with Helmut Walcha and harpsichord with Maria Jager. He also has been a soloist with the Hartford Chamber Orchestra.

Pittsburgh improved?

By Mark Pukalo
Associate Sports Editor

At the pre-season Big East press luncheon the majority of coaches and players felt that Pittsburgh would be the most improved team in the conference.

But at this point they are 14-7 (going into Wednesday's game against UConn), that's just one game better than last year's 13-8 mark through 21 games. Is this major improvement?

BIG EAST BEAT

The Big East is without a doubt stronger than last season and possibly the strongest conference in America at this time, but Pitt is still not living up to pre-season raves.

They play virtually the same type of game as last season with freshman Charlie Smith taking graduated Clyde Vaughn's place, frosh guard Demetrius Gore replacing the departed George Allen, forward Andre Williams is playing worse than last year and guard Curtis Aiken is playing better. Does this not add up to the same team?

It may be, but the Panthers have had the tendency to peak at the end of the season in the past six or seven years. Last season they made the final eight of the NIT before bowing to Notre Dame after ending the regular season 15-12 and losing to Villanova in the first round of the Big East tournament.

Pitt reached the finals of the Eastern Eight four out of five

years after average regular seasons. They won the league's tournament in 1981 and '82, and went on to the NCAA tourney where they won one of three contests; the win was over nationally ranked Idaho.

So it would seem that Pitt is a second half team. They aren't doing anything to discount that theory this year either. In their last seven games Pitt has won five, only losing two relatively close decisions to Villanova and Syracuse.

Only three times this season have the Panthers lost when they should have won, not because they were a better team, but because they blew big leads. They let UConn and Florida State come from 15 points down to beat the Panthers, and Xavier came from six behind in the

Heading that Syracuse fast break was Jadeane Daye who was 12 of 14 from the floor for 24 points with 14 of those coming in the second half.

"We couldn't get set up on defense and Daye got hot," the coach said. "But defense wasn't the problem. We made some critical offensive mistakes and it cost us."

As a team the Huskies shot only 45% from the floor and were out rebounded 34-25.

Senior captain Leigh Curl lead UConn in scoring with 15 points while Peggy Walsh and Tammi Sweet had 14 points apiece. Syracuse freshman Felisha Legette was the second leading scorer in the game as she poured in 18 points.

With the loss the Huskies fall to 8-15 overall and 3-11 in Big East play. Syracuse upped its record to 13-12 overall and 8-6 in conference play.

Next, UConn will be at Rhode Island. "We will enjoy the week off," Henle said. "This is a good time for the break."

The Husky women, now 7-6, are rounding into shape for the ECACs, coming up in a few weeks.

A breakdown of the recruits by state is: Connecticut-13, Massachusetts-3, New Jersey-2, New York-2, Minnesota-1, and Rhode Island-1.

Jackson said that there are still a number of recruits who have yet to sign a letter and are being sought by other schools. He said that he should know which school these athletes choose within the next few days.

had her second highest score on the three meter board this semester—which was less than one point away from her record. Leffever will be going to New England Championships next weekend at Springfield College. Team-mate Coe will join Leffever at the meet.

"Jeanette has a good chance of taking first place at New England's, although there will be competition. I'm very pleased with the way things are going."

second half to steal one from coach Roy Chipman's team.

The Panthers (5-5), and tied with Boston College for fifth in the conference have a tough road to hoe after UConn. They play at St. John's, Syracuse and Georgetown on the road along with BC and Villanova at home to close out the regular season.

Freshman Charlie Smith is the leading scorer and rebounder for the Panthers and has progressed beyond coach Chipman's expectations.

"Charlie is just learning and performing well every game," he said. "He can do anything out on the court that a great forward is supposed to do. He can rebound, shoot, and can handle the ball as good as any six-foot 9 inch player around."

Up front with Smith are seniors Andre Williams and Chip Watkins along with juniors Keith Armstrong and Matt Miklasevich. Williams was playing the best basketball of his life at the end of last season but this year he has lost his starting job to Watkins and has seen a lot of time on the pines. Watkins is a veteran hard-nosed forward who seems to play well in the big games. Miklasevich is a banger and Armstrong is a load and a half down low. Also, Daryl Shepherd, a great athlete sees action when Chipman needs offense.

Curtis Aiken leads the backcourt. The sophomore scored 39 points a game his senior year in high school but scored

only 3.6 a contest last year. He is a much different player this year running the show with George Allen gone. He has scored 12 points a game and has run the team extremely well. His backcourt mates Joey David and Demetrius Gore are sharing time these days. David, a fine outside gunner and Gore, a flashy six-foot 5-inch scorer have been inconsistent and that has hurt the Panthers. Junie Lewis, a freshman, has been seeing more and more action in the past five games.

Pittsburgh has not improved a whole lot from last year, but they are in better shape at this point in the season confidence-wise than last season. Don't be surprised if these young Panthers make someone very scared in the Garden this March.

Providence coach Joe Mulaney is gone at the end of the season. This opens speculation on who might be the next Friar coach. One man that might have a chance is Jim Calhoun head coach at

Northeastern. He has been winning there for a while and may want to move up to the big time. Ernie DiGregorio may apply for the job, but he has about as much a chance as Marvin Barnes of being the next coach.

Rafael Addison hit Providence for 31 big points Tuesday. Addison has become more than a threat for the Orange who are suddenly the team they were supposed to be at the beginning of the season.

Boston College scored 101 points against Seton Hall Tuesday, getting 58 in the second half. You've got to wonder if Seton Hall coach P.J. Carlesimo forgot to put in his fifth man.

Big games coming up this week: Thursday, Seton Hall at Syracuse, Friday; Pitt at St. John's, Saturday; Georgetown at Providence, Villanova at BC, LSU at Syracuse and Delaware St. at UConn, Sunday; DePaul at St. John's.

Gymnasts show best efforts

By Mark Pukalo
Associate Sports Editor

UConn showed their best in their final home meet.

Patty Cauley had two personal bests, Nancy Andrews tied the school record on the uneven bars and Maureen Russo, along with Chris Morrissey made strong performances in their final home appearance as the women's gymnastics team topped Brown at Hawley Armory Wednesday.

Russo won the floor exercise with her first 9.0 of her career and also won the vault with an 8.9, topping her teammate Robin Zak by 0.05. Morrissey was second in the all-around, scoring 34.10 trailing her teammate Cauley who scored 34.35, her personal best.

Morrissey and Russo received praise from their coach.

"They've been outstanding for four years," coach Geri Henle said of her two captains. "It's nice to see them perform so well in their last home meets."

Morrissey got a rousing applause after her 9.0 in the floor exercises ended her home career. The 9.0 tied Russo who had gotten her best score ever in her last performance.

The two seniors had fine performances, but Cauley, a sophomore, led the way in the overall.

"We were a little weaker without Carol (McDonough), who is out with the flu and we were all a little weary, but we got it together on the uneven bars," Henle said. "That was the turning point."

It was a big event for Nancy Andrews who tied the school record with a 9.1.

Football team signs top recruits

By Jim Acton
Sports Editor

It wasn't too long ago that a Connecticut high school football star wouldn't have thought of UConn as the place to go for a successful collegiate career. Well, it appears that UConn coach Tom Jackson has changed that image of the school and is now able to get some of Connecticut's top athletes to come to Storrs.

Jackson and his coaching staff signed 22 recruits to National Letters of Intent Wednesday, including 13 scholastic athletes from Connecticut. The 22 signings tops last year's mark of 18 athletes, of which 10 were from the state.

"I am extremely pleased with this recruiting year," Jackson said. "All the athletes we have signed are real quality players. I think any of them can make an immediate impact on our program."

Topping the list of signed recruits is quarterback Steve Nadeau of St. Raphael Academy in Pawtucket, Rhode Island. Nadeau, 6-foot, 165 pounds, threw 33 touchdown passes the past two seasons and led his team to a 22-1 record.

He was named Rhode Island's 1985 All-State quarterback by the Providence Journal.

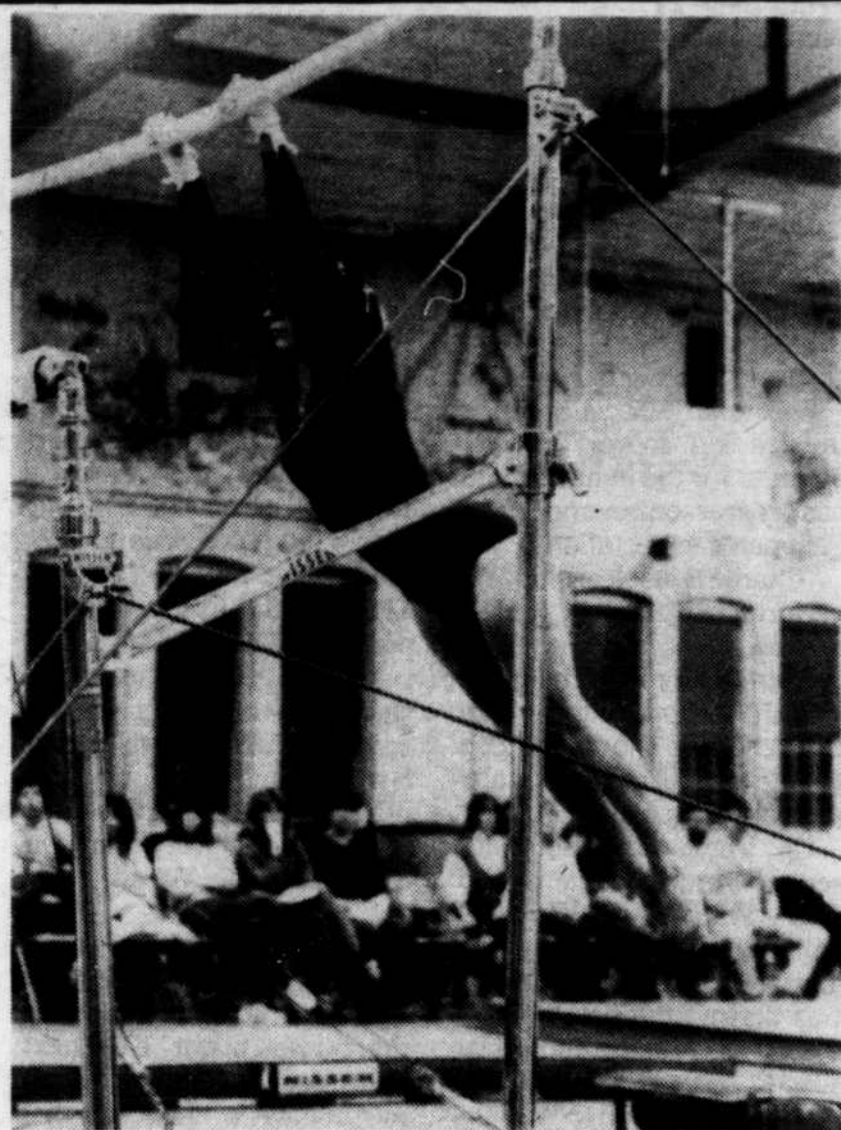

Jackson also signed two other quarterbacks, both coming to UConn by way of prep schools. Mark Moe, 6-foot-3, 210, a native of Minneapolis and a student at Choate and Steve Sundberg, 6-foot-1, 180, a Meriden resident and currently enrolled at Maine Central Institute, will both be attending UConn in the fall.

Another top signee for the Huskies is running back Anthony Grant of Hartford. Grant, 5-foot-7, 170, attended Glastonbury high school, where he scored a state-record 32 touchdowns last season.

"We have some really talented people coming here at the skill positions (quarterback, running backs, receivers)," Jackson said. "We have holes to fill and these people will definitely help us. We have some questions that I think these kids can answer."

A letter of intent is a written agreement for an athlete to attend a Division I school that offers grants-in-aid to its athletes. Once an athlete has signed a letter, he cannot transfer to another

Orange top Huskies

By Paul Venables
Staff Writer

The main concern of the women's basketball team coming into last night's game with Syracuse was the Orangewomen's fast break. A "track meet" was the last thing Husky coach Jean Balthaser wanted the game to turn into and that's exactly what happened as the Huskies were beaten 74-59 at the field house.

Despite turning the ball over 16 times in the first half, the Huskies trailed by only three at half time. After a pair of Tammi Sweet 25-foot jumpers UConn was down only 49-48 with under nine minutes

to go in the contest. That would be the closest the Huskies would come as they began turning the ball over and making offensive mistakes. Coach Balthaser pointed to the offensive breakdowns as the key to the team's downfall.

"In the first half, we played good defense and set up the offense," Balthaser said. "But later on we put up very poor shots with nobody on the boards and it gave the fast break to them. Instead of being down by only two we found ourselves down by six. It turned into a transition game that we just couldn't play."

UConn loses important game to Pitt

PITTSBURGH (AP)—Freshmen Demetreus Gore and Charles Smith led a second half

Pittsburgh comeback that carried the streaking Panthers to a 78-71 Big East Conference vic-

tory over UConn on Wednesday.

Gore and Smith teamed to score 25 of Pitt's first 27 second-half points as the Panthers blew a 10-point first-half lead, then recovered to open up leads of as many as nine points down the stretch.

Gore ended with 23 points and Smith, a former Connecticut high school star, added 18 all but four in the second half as Pitt raised its conference record to 6-5. The Panthers, winning their fifth game in a row, withstood a game-high 26 points by Connecticut guard Earl Kelley.

The Huskies, trailing 30-20 in the first half, recovered to take leads of 49-47 and 55-54. But Smith put Pitt in the lead for good with a 10-foot baseline shot that made it 61-59 and then raised the Panthers' advantage to four points with a pair of free throws on Pitt's next possession.

Gore bombed in a 20-foot jumper that made it 65-59 with 5:50 to play and UConn never seriously threatened again as Pitt, 15-7, pulled away to its fourth consecutive conference victory.

Curtis Aiken, scoring all of his points from the foul line, and Chip Watkins each added ten points for Pitt. Alvin Frederick had 13 points, all in the second half.

Swimmers lose

By Shari Hoffman
Copy Editor

Dana Redman, a sophomore and leading point getter for the team, broke both the university and pool records in the 200 yard breast stroke event with a time of 2:30.539. Winning three events last night, Redman also took first place in the 200 Individual Medley relay and in the 100 yard breast stroke, but the Women's swimming team lost to West Point Academy Wednesday at Brundage Pool 79-61 in their last meet of the season.

Karen Macginnis, also an important team leader in individual events, swam in the 100 and 200 yard breast stroke events. Seniors Lisa Kenny and co-captains Jane Polley and Claire Viola, along with freshman, Susie Lyons won their last home meet event of the season in the 100 yards free style relay. Their time was 3:50.9.

On their own, Kenny achieved her best time in four years and took a first place in the 50 yard free style. Polley

took second place in the 100 yard back stroke and Viola took first place in the 100 yard butterfly and also placed second in the 200 yard butterfly.

Coach Peter McDevitt said about the season, "We did the best we could. We're about a year or two away from being a great team with only three seniors this year out of 20 members." He said about 12 or 13 members will be attending the Big East Championships.

Diving last night against Army was Jeanette Leffever and Carolyn Coe. Leffever broke her own record for one meter diving for the third time this semester with a score of 254.65 (235.65 old record). Leffever also broke the school and pool record previously broken by Patty Stone from Harvard, a three year NCAA All American. Leffever also
